

Care of Our Chooks

If you've volunteered to look after our girls, please complete all the tasks below to keep us healthy

Everyday

- **Water** - check and refill if necessary. Add one tablespoon of apple cider vinegar if you like.
- **Pellets and Grit** - check feeder container and add pellets as needed. Add a little grit from time to time to keep our egg shells hard.
- **Clean our Coop** - get rid off poo and old veggie scraps so they don't rot and attract vermin. Place in compost.
- **Treats and Foraging** - place some fresh greens and supplementary grains in the coop. And if you can, let us out to wander while you're at the garden.
- **Collect eggs**

Weekly - Saturday

-Replace the bedding in the nesting box and add some garlic shells, lavender or rosemary to prevent mites.

Monthly - Working Bees

- Clean out our compound completely
- Place fresh straw on the floor of the compound.
- Sprinkle Diatomous earth on our roosts, the floor of the compound and in our nesting box.

Remember to share eggs!

Please don't take eggs when it is not your day on the roster.

The chooks lay throughout the day, and members often collect eggs in the afternoon and evening.
